Re: Amending City of Salisbury Practical Plumbing Code

Attached is an ordinance which amends the Salisbury Practical Plumbing Code to include the 2007 Washington Suburban Sanitary Commission Fats, Oils and Grease Requirements.

The State Plumbing Code is a minimum code which applies state wide and allows local jurisdictions to make amendments or adopt more stringent requirements based upon their particular needs. The purpose of the code is to prescribe minimum requirements necessary for the protection of health and safety through proper design of plumbing systems. Additionally, with the input and recommendation from the Department of Public Works, I've included the adoption of the 2007 Washington Suburban Sanitary Commission section regarding fats, oils and grease requirements to provide a higher level of regulation and protection from such discharge from entering the waste water treatment plant.
