

## Green Team Meeting

February, 1<sup>st</sup> 2017

Room 303 GOB 5:30 PM

Attendance: Kacey, Ryan D, Ryan W, Matt, Jim, and Charles

### Introductions

### Kacey's Pricing Updates

- Priced out (20) t-shirts with "Green Team – City of Salisbury" with 2-3 colors on the front. These shirts came to \$12/piece. With colors on the back, that price changes to \$14/piece.
- Grocery Bags – non canvas bags are cheaper, but we're still waiting on a price. (We discussed a possible social media campaign for these. 1<sup>st</sup> 100 People to take a picture recycling something and "like" the page could receive a bag)
- Stickers: 9" x 2" (1000 count) \$400
- Magnets: No price yet but are apparently more expensive

FACEBOOK question: Can we have a Facebook page? If so, who would be in charge? Are we autonomous or would the city still maintain control?

### Group Input:

Ryan D:

- Put an article about the Green Team into the Salisbury Independent – this wouldn't cost anything and would be great exposure for the committee.

Matt:

- Mentioned possibility of beach communities purchasing recycled glass to build barrier dunes to protect their communities since county is having a difficult time selling recycled glass. (Glass is mixed, rather than sorted by color. Colors burn at different temperatures and are also used for different purposes when recycled)

How could this happen? Country owns the glass, not the city, so we would need some type of group effort. We'd also be selling to a separate county which might make things even more difficult.

- Use old cask barrels for rain barrels. These could be donated by local breweries once they've finished with them.
- Earth Day event down at the Zoo (Likely same day as SU Earth Day event)
- Flyer with information on rain barrels, composting, and recycling

Jim:

- SU will be funding our grant for the rain barrels. Students will write this for us (this is already in place)
- For things taking place on the SU campus, the University is inclined to control the marketing of such events

EVENTS:

Rain Barrels at the Wicomico County Extension Office – at the end they are given out to this whom participated.
