# Landscape Architecture

DEPARTMENT OF PLANT SCIENCE AND LANDSCAPE ARCHITECTURE

## Community Classroom

### - Creativity

The ability to be creative, to create something from personal feelings and experiences, can reflect and nurture children’s emotional health. The experiences children have during their first years of life can significantly enhance the development of their creativity.

### - Learning

Environmental education helps students understand how their decisions and actions affect the environment, builds knowledge and skills necessary to address complex environmental issues, as well as ways we can take action to keep our environment healthy and sustainable for the future.

### - Connection

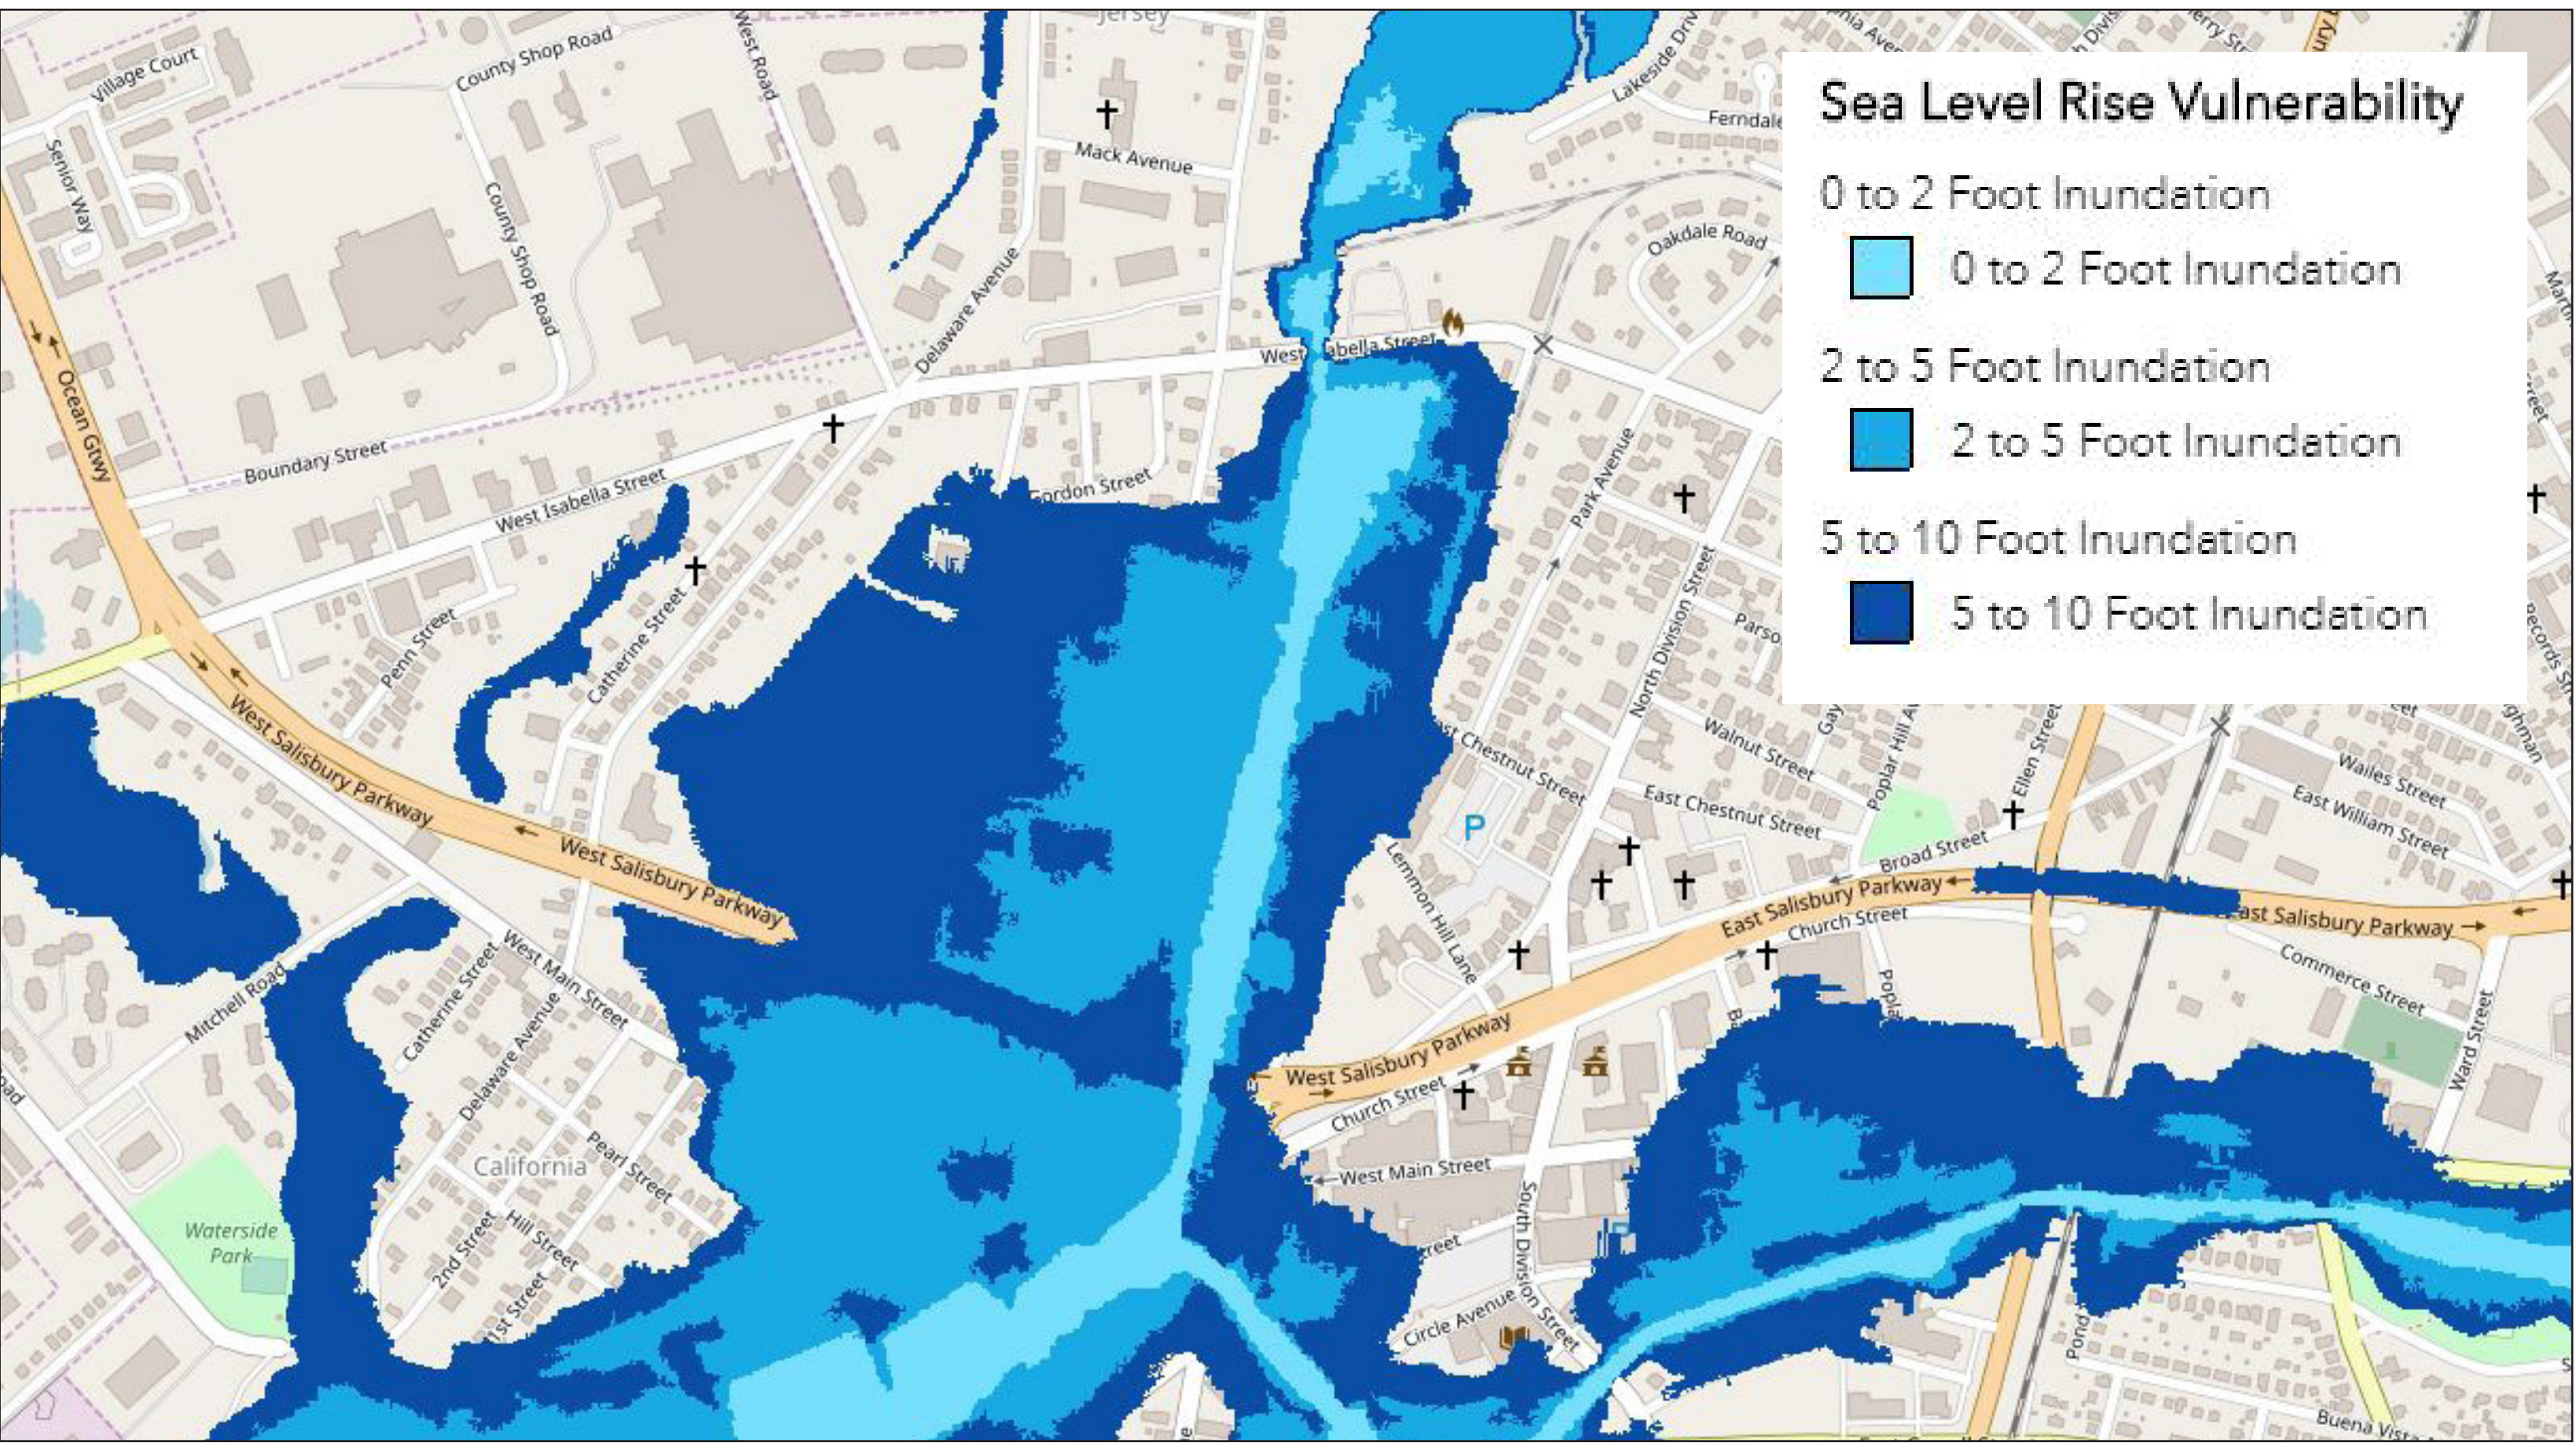

(People, Environment, History of Salisbury)

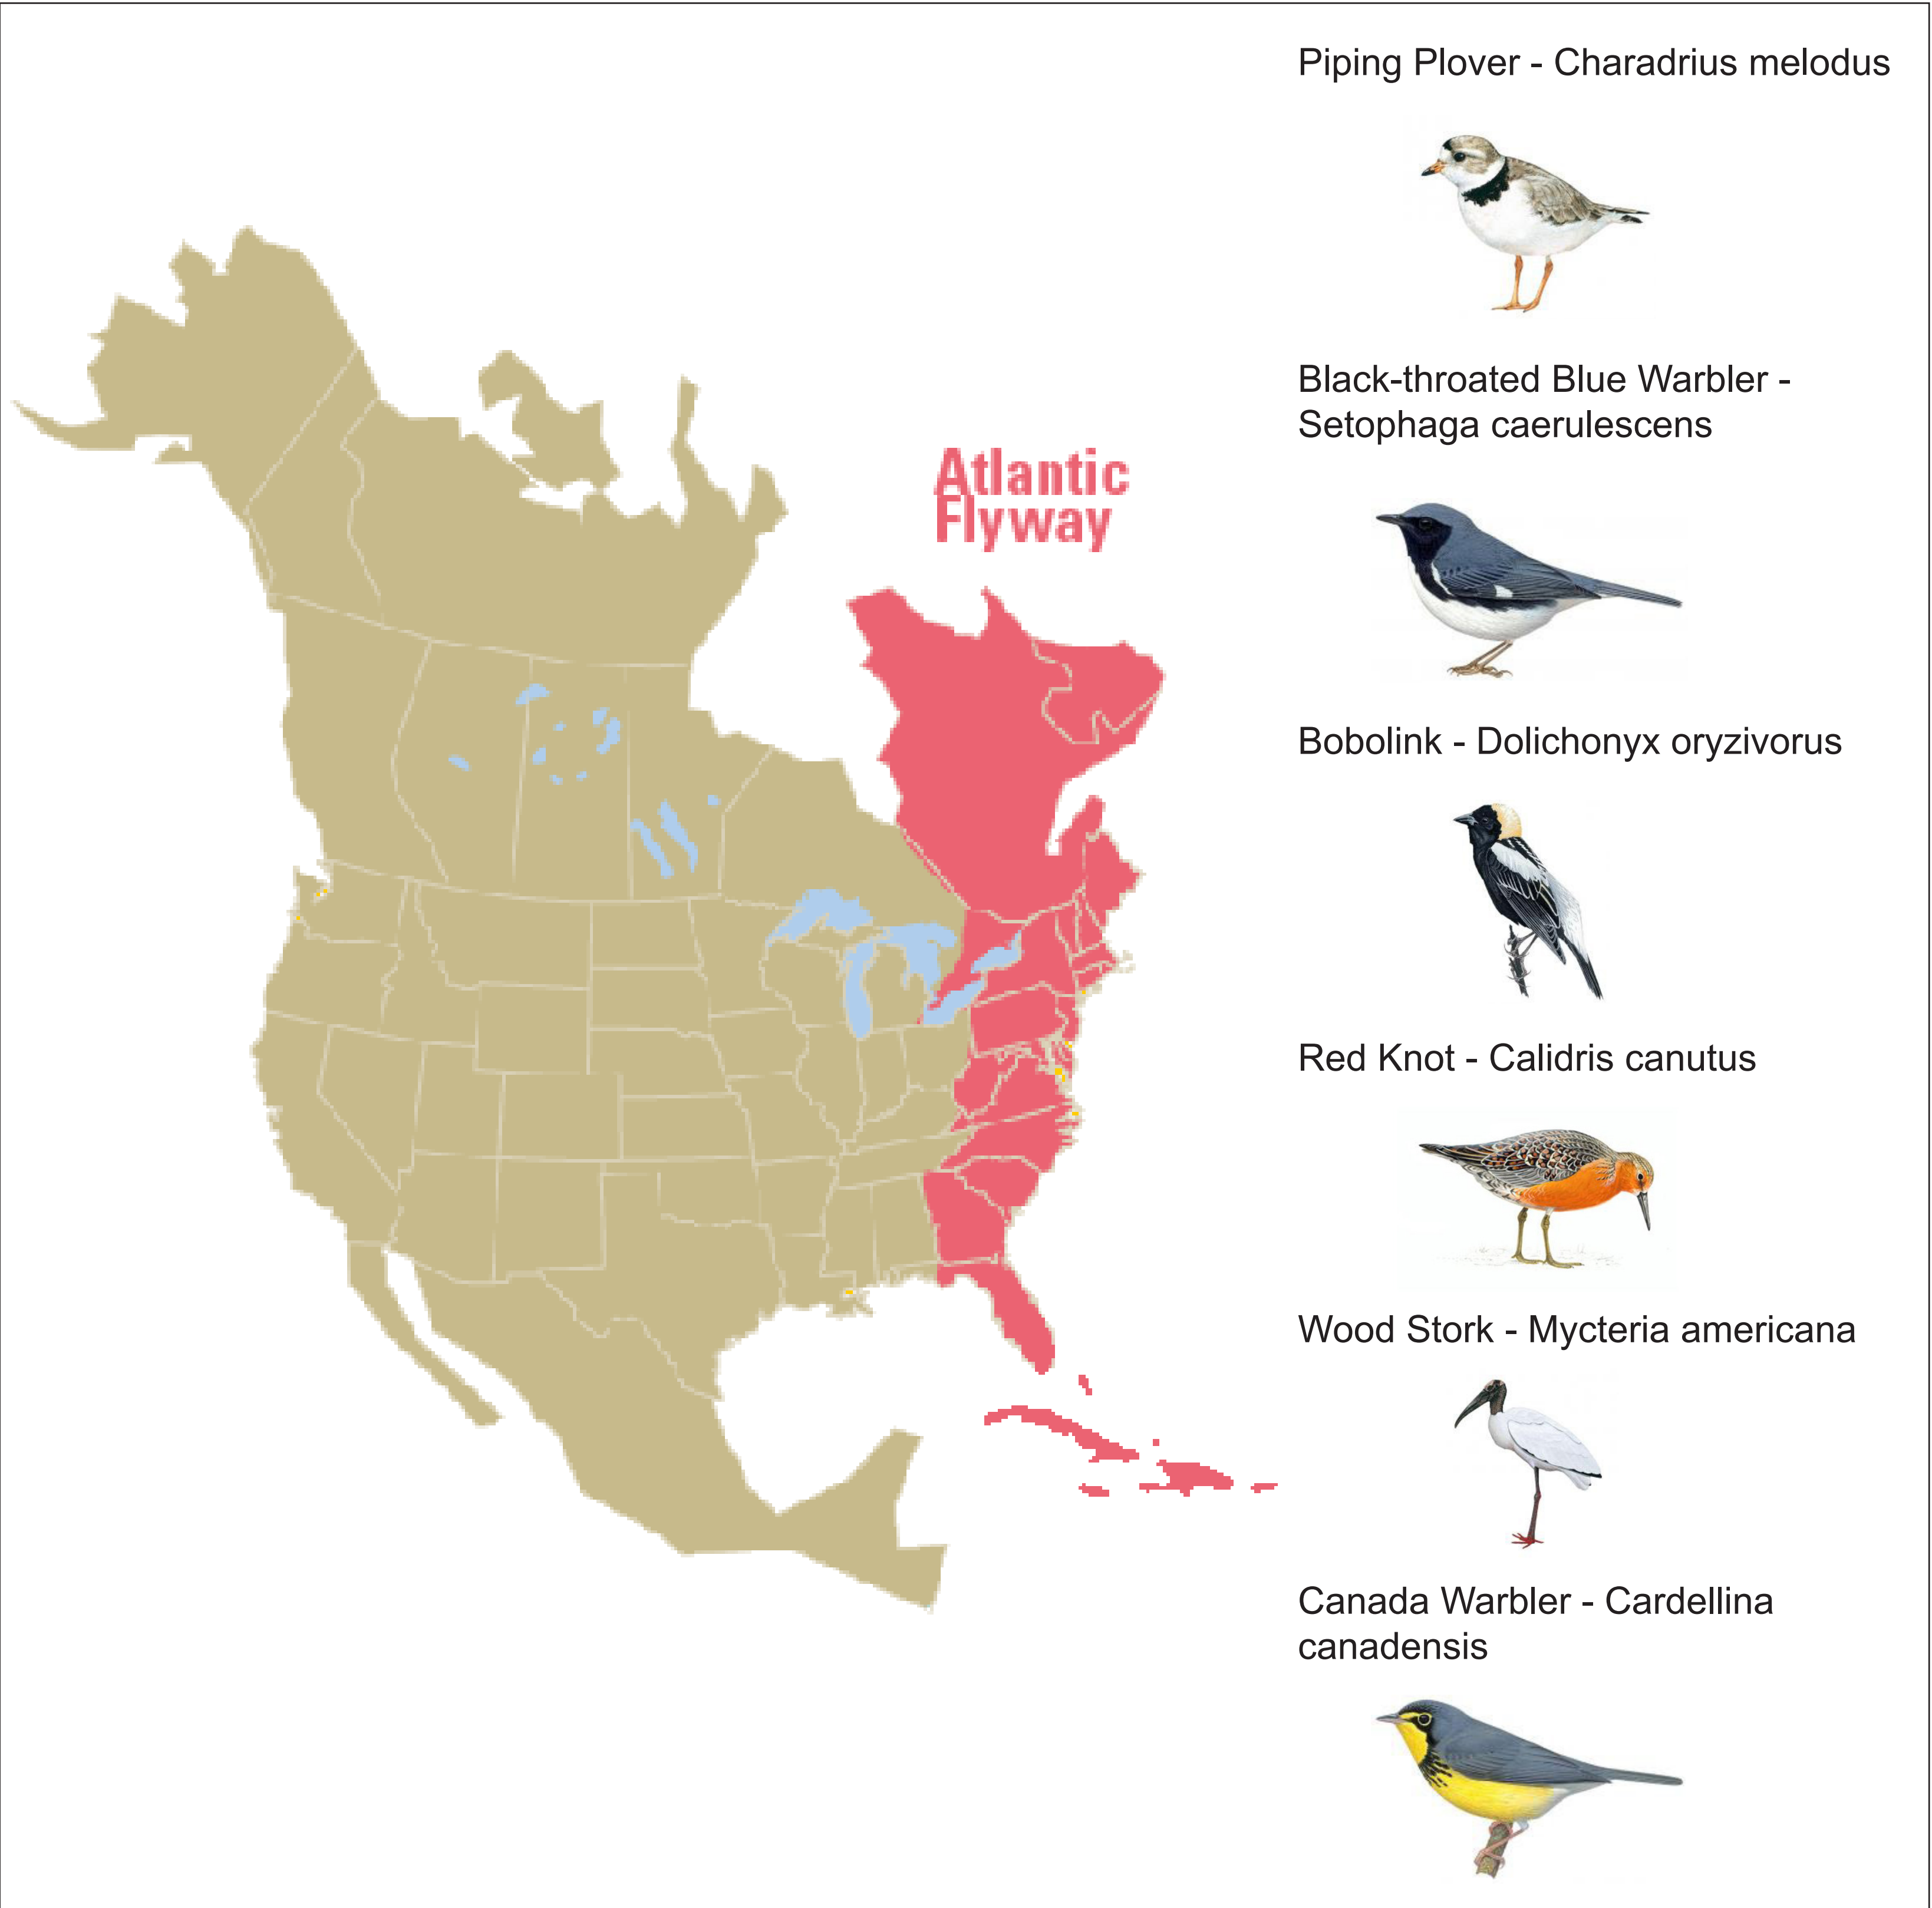

## Design Process

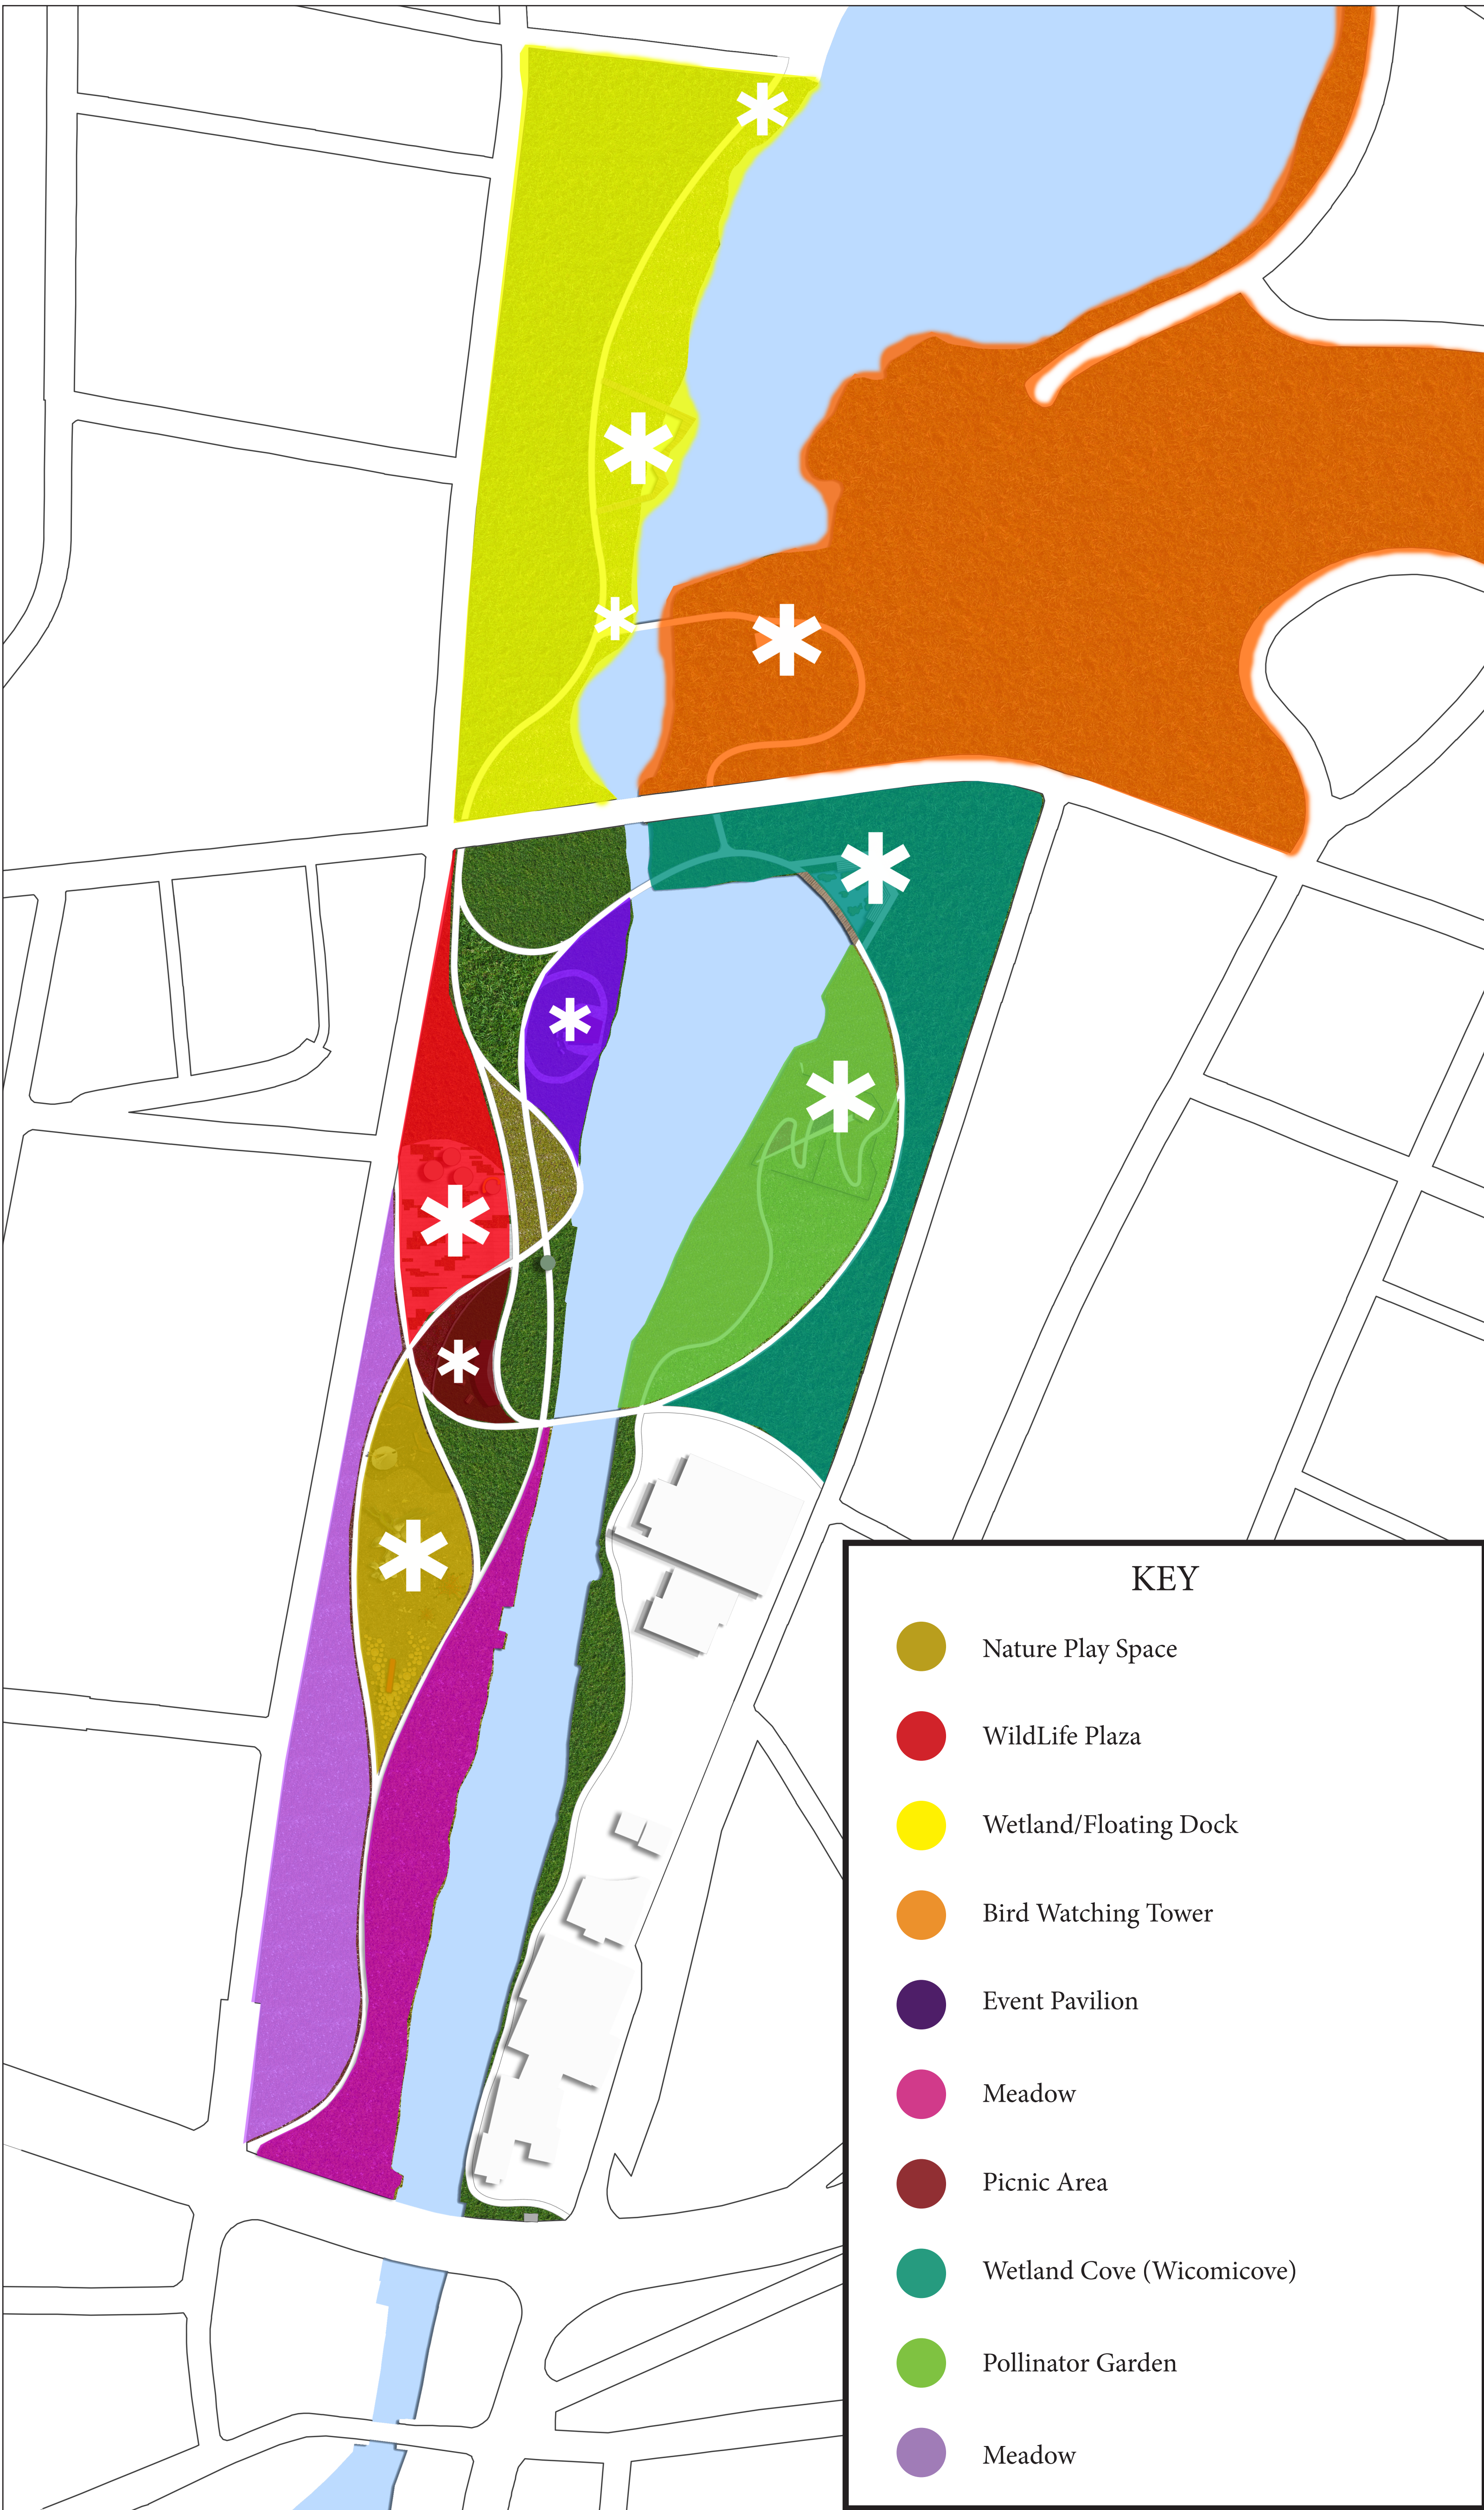

## Sea Level Rise

## Atlantic Flyway Species

## Functional Diagram

1. Floating Wetland Dock

2. Wildlife Plaza
