Approving Building Official

REQUIREMENTS FOR DEMOLITION OF RESIDENTIAL AND COMMERCIAL STRUCTURES

These requirements are guidelines and requirements for all structures being demolished within the City of Salisbury corporate limits:

GENERAL REQUIREMENTS

- All demolition work shall be done in accordance with City, State and other applicable laws.
- The contractor will erect any barriers/fencing, silt fences, etc. as required by the city code and necessary to keep pedestrians off of the property during demolition work. All safety barriers will be removed upon completion of work.
- All work is to be conducted in compliance with generally accepted safety standards, with no damage or disruptions to adjacent property, utilities and city sidewalks and streets.
- The contractor shall have all sewer, water and gas lines removed and capped at the edge of the property. The contractor shall coordinate with the City Plumbing Inspector to ensure proper disconnection of water and sewer and Chesapeake Gas for gas disconnection.
- All interior sidewalks/walkways (not City sidewalks) shall be removed and backfilled with topsoil, graded and seeded.
- Upon completion of work, the site and sidewalks will be policed of all debris and trash and will present a neat appearance. **It will be the demolition contractor's responsibility to call City for a final inspection 24 hours in advance.**

HOUSE REMOVAL

- The house is to be taken down completely to the ground, basement of slab and backfilled as specified below.
- If there's a basement, slab there should be holes broken into the slab so that water can drain.
- All basement walls should be removed and not collapsed into the basement area.
