Closing Date: Open until filled.

About Water Works

The Department of Water Works is responsible for the City water and wastewater systems and treatment facilities. The Department has two Divisions, Water and Wastewater, with a total staff of 50 professionals. The Department is responsible for the treatment and delivery of potable water to City homes and businesses, storage of water and maintenance of a network of piping, valves, and hydrants for fire protection, collection of wastewater and conveyance to a state of the art treatment facility to protect public health.

Profile

Performs standard chemical and biochemical analysis of wastewater and sludge as required by Federal and State guidelines to ensure safe and efficient operation of the wastewater treatment plant. Including BOD, TSS, pH, phosphorus, and nitrogen. Cleans, calibrates and maintains lab equipment. Performs routine calculations.

Preferred Education

- Associate's Degree in Science.
- Actively pursuing Bachelor's degree in Biology, Chemistry, and/or Mechanical Engineering.

Preferred Experience

2 years of related experience.

Requirements/Certifications

Drinking Water Collections Certification from Maryland Department of the Environment.

How to Apply

1 Visit salisbury.md/apply

2 Submit City application, cover letter, and resume

Studies have shown that women and people of color are less likely to apply for jobs unless they believe they can perform every job description task. We are most interested in finding the best candidate for the job, and that candidate may come from a less traditional background. The City may consider an equivalent combination of knowledge, skills, education, and experience to meet minimum qualifications. If you are interested in applying, we encourage you to think broadly about your background and skill set for the role.
